<b>Introduction</b>	Established in 1997, Guangdong Zhengye Technological Liability Limited Company is a high and new-tech enterprise and is engaged in researching &developing, producing, selling and after-sale services of the precision detection equipments and electronic materials. In recent years, the company is dedicated to researching and developing domestic scientific instruments and equipments through the scientific developing mode of "independent research and development" , "introducing, digesting, absorbing and then re-innovating" and "combination involves producing, teaching & researching" . We have independently worked out and produced more than 40 kinds of testing instruments and equipments for rigid and flexible board such as ionic contamination tester,visual inspection machine,X-ray inspection machine, impedance test system etc.. All of the products have our own intellectual property rights,which also have filled the domestic gap. To some extend it has met the demand for high quality inspection of the electronic circuit industry . In the process of continuous development of the enterprise, we have also won high evaluation from the government and this industry and has been awarded as outstanding national brand enterprise in the first China electronic circuit industry, national standardization good behavior enterprise AAA unit, the grow small and medium-sized enterprises with high potential, the national torch plan, the famous trademarks of Guangdong province, the major provincial-supported equipment manufacturing enterprises,technology center of all enterprises in Guangdong and preponderant enterprise in intellectual property in Guangdong, etc. At present, the company' s selling market covers the Pearl River delta and Yangtze River delta region and is stretching to South Korea, Taiwan and other southeast Asia countries (regions). In future,Zhengye Technology will continue to provide sincere service for customers and further focus on outstanding technical innovation .We will constatly improve the accuracy and stability of testing instruments,laser equipment and strengthen our brand construction with the aim to build ourself to a pace-setter-of laser equipment and electronic circuit industry

<b>Introduction</b>	<p>Foshan City Nanhai District Minghui Machine Tool Factory, located at the beautiful and rich Pearl River Delta hinterland, bordering on Guangzhou, Shenzhen, Zhuhai, Hong Kong and Macau special area, has convenient communications. The factory, integrating in R&amp;D, production, sale and services providing of the machine tools, has powerful technology, large and high-accuracy processing equipments, strict test facilities, scientific quality control system and rigorous, sophisticated technology R &amp; D personnel. A series of products manufactured by the company as walking beam type Longmen Miller, Fixed beam Longmen grinder, precision Longmen milling machine, Precision single column milling machine, Single horizontal milling machine, Horizontal single-column milling machine, chamfering machine, Longmen milling head and elbow (Universal elbow) and etc.. are adopted to advanced Electronic frequency conversion stepless speed change which featured on Hi-grinding force, production efficiency, low cost, convenient operation, safety and easy maintenance. The company adheres to the management idea of constantly strive for perfection. Its machine tool components by annealing with VSR dual combination stress relief treatment skill are strong rigidity and mechanical change is not easy. Super audio guide by heat treatment enhance the service life of the machine tool and mechanical properties, so that the friction coefficient is reduced to the minimum and ensure the precision machining enduring.</p> <p>We won the majority of customers trust by established professional and strict quality control system and perfect customer services system to provide high quality products and excellent services. Our products sales well both on domestics and abroad, and increased year by year.</p>

<b>Introduction</b>	<p>Foshan Goldwin Machinery Manufacturing Co.,LTD sets up in 2003. It locates in Foshan, Guangdong Province, one of the Pearl River Delta cities. Goldwin is near by Guangzhou, convenient for Land and sea and air transportation. It's a company that set the development, design, production, sales in one of the through-train business. Foshan Goldwin Machinery Manufacturing Co.,LTD and Kingdom Automation Equipment Co.,LTD are long term partner, it means that the unions has abundant technical strength. Goldwin specializes in researching and manufacturing machine components processing, work welding and food pack-aging machines. It has experience for machine manufacturing and processing many years, has abundant technical strength, perfect processing equipments, advanced experimental method and scientific management method.</p> <p>Goldwin and Kingdom provides machined parts for food machines, pack-aging machines, beverage machines, medical hardware, vehicle, papermaking, environmental industry and wind power electrical machine etc. with high quality and very competitive prices. Kingdom has import and export certificate. Her client focus to oversea. We are producing machined metal spare parts with our CNC machines according to your requirements, drawings or samples. Presently, we have three factories, the total building area is 10000 sq.m., and we also run one independent office unit with 1000 sq.m.. There are generally complete lathes/tools set for machining/processing parts. After the development in recent years, we become one of the most powerful machine processing company in Foshan.</p> <p>Core competence of our company is high precision processing and high quality. Measurements precision of products can meet customer requirements. Throughput can reach over one hundred million a year now.</p> <p>Our company increases investment strength continued many years. Our principles are to "abide by contract, keep our promise, equality and mutual benefit, Sincere cooperation, Quality first, the user is supreme". We are trading with many countries in Asia, Europe and the Americas, trade import and export volume increasing every year.</p> <p>Foshan Goldwin Machinery Manufacturing Co.,LTD hopes to establish and develop cooperation relationship with the people at home and abroad with excellent technical personnel and honor cooperation attitude to promote common prosperity and development.</p>

<b>Introduction</b>	Being set up and registered in June 22th, 2011, Guangdong Saifei Sapphire Technology Co., Ltd. locates in Guangzhou (Meizhou) Industry Transfer Industrial Park, Meizhou city, Guangdong province. We are a large enterprise with up to 600 million registered capital, 3.8 billion total budget investment, 12 billion annual production value. Occupying 296 acres area, our company has become the key construction unit in Meizhou city, Guangdong province. Breaking ground in July 28th, 2011, our project is planned to finish in 3 years, and completely put into production in 2014. After the complete establishment, our company will possess over 4000 industrial workers, over 200 management and scientific research personnel. Integrated production and scientific research as one, we have the most advanced sapphire production technology and R & D laboratories. Being engaged in the production technology and new product R&D, we will have over 80 full-time scientific research personnel after our complete establishment. To build the top scientific research team in national sapphire industry, we also have the speedy industrial advantage in scientific research result, which will makes us a bright pearl in national LED industry chain.
