Project XVI: Sewage Treatment Plant (Phase 1) in Guangdong Shunde-Qingyuan (Yingde) Industrial Special Cooperation Zone

Project XVII: Land #F06, Desheng Central Business District in Shunde

Project XVIII: Standard Factory Buildings in Guangdong Shunde-Qingyuan (Yingde) Industrial Special Cooperation Zone

Project XIX: City-level Project of Development and Construction in Area B of China South Wisdom Valley in Shunde

Project XX: Zhide Building in Area B of China South Wisdom Valley in Shunde

Project XXI: Shunde (Jun’an) International Ecological Valley

Project XXII: Distributed Energy Sources in Shunde

Project XXIII: Improvement for Shunde’s Traffic Network

Project XXIV: “Three-old Renovation” Project of Leliu in Shunde

Project XXV: The Construction of Jun’an 3rd Bridge in Shunde

Project XXVI: Road Renovation of Ronggui Urban Area in Shunde

Project XXVII: South China Wisdom Valley

Project XXVIII: “Three-old Renovation” Project of Old District of South Lunjiao

Project XXIX: Friends of the World Industrial City

Project XXX: Hongyu Industrial Park

II. Agriculture

Project I: Processing Base of Agro-industry

III. Light Industry and Building Materials (Including Food Processing Industry)

Project I: Subtropical-fruit-wine Production of Nangno Xiangyi Brand

Project II: Healthcare Products of Sheng'ao Brand

Project III: Storing and Deep Processing of Agricultural and Sideline products, and Aquatic Products

Project IV: Production of LED Energy-saving Lamp

Project V: Deep Processing of Marine Products

Project VI : Cereals, Oils & Foodstuffs Processing Warehouse Base

Project VII: Artificial Quartz Stone Slab with an Annual Production Capacity of 800,000 Square Meters

IV. Machinery

Project I: Manufacture of Various Types of Port Machinery

Project II: Marine Engineering Equipment Manufacturing Services Base

Project III: Stone Machinery

V. Electronic Information

Project I: China FPD Market

Project II : Zhuangyuan Valley E-business Industrial Park

Project III: Hongda Xingye Group & Guangdong Plastics Exchange Headquarters Building

Project IV: The National Industry Base of Digital Home Application and Demonstration

Project V: High-definition Video Complex Cable

VI. Chemical and Medicine

Project I: Guangzhou International Health Industry City

Project II: Liquefied Petroleum Gas Transfer Station in Nan'ao County

Project III: Airproof Strip for Vehicle Window

Project IV: Development and Application of Marine Microalgae Powder That is Rich in DHA and DPA

Project V: Coastal Large-scale Integrated Refinery Project

VII. Service Outsourcing and Service Industry (Including Hotel, Cultural and Creative Industry, and Logistics Industry)

Project I: Guangfo Digital Creative Park

Project II: Plastic Chemical and Storing Logistics in Shantou Bonded Zone

Project III: South China Automobile Cultural Park

Project IV: Meizhou Hakka Culture and Animation Creative City

Project V: Five-star Resort in Guangdong Shunde-Qingyuan (Yingde) Industrial Special Cooperation Zone

Project VI: Sanitation Cleaning and Rubbish Transportation in Longjiang, Shunde

VIII. Tourism and Others

Project I: Fengliang International Hotspring, Sports and Recreation Resort

Project II: Nantai Mountain Reclining Buddha Cultural Tourism Industrial Park, Pingyuan County

Project III: Mountain E-huang-zhang Ecotourism Zone

Project IV: Economic Zone along Desheng River

Project V: Tourism Cultural Construction of Fengjian Watertown, Xingtan, Shunde

I. Infrastructures and Industrial Parks

Project I: Guangzhou International Biotech Island (Guangzhou national biotech industrial base)

Project Description: Guangzhou International Biotech Island (GIBI) belongs to the first group of national biotech industrial base in China and is accredited as the key project of the Reform and Development Outline of the Pearl River Delta (PRD) Region (China's latest national development strategy).

GIBI covers an area of 1.83sq.km. Situated on the Pearl River, GIBI occupies the "heart" of Guangzhou, with Guangzhou Higher Education Mega Center to the south (China's biggest university town), Guangzhou CBD and Pazhou Exhibition Center (venue for Canton Fair) to the north, Whampoa Military Academy to the east and Yingzhou Eco-orchard (also named "South Lung of Guangzhou") to the west. GIBI also connects conveniently with the city transportation system such as Metro Lines, Express Ways, High Ways and Sea Ports.

At present, most of the infrastructures in the island have been finished. They include the country's first underground recycling plant, “office, R&D, and pilotscale experiment” integrated standard property unit, etc. A group of advanced facilities such as the platinum five-star hotel (500 deluxe rooms and 15 presidential suites), the international innovation center (two 210m high buildings), scientist apartment, and so on, are all under construction.

In the future, GIBI will become a huge community of biotech enterprises, talents, and information gathering center, with governmental services, finance, trade, exhibition, life support and other awesome features.

Our vision is to build the Bioeconomy Manhattan and the Bio-finance Wall Street. We are looking forward to become the “CBD (Central Biotech District)” in China.

Mode of cooperation: Investment Promotion for GIBI

Period of cooperation: Depend on specific project

Total investment : Depend on specific project

Chinese side's investment: Depend on specific project

Foreign side's investment: Depend on specific project

Estimated payback period: Depend on specific project

Project site: Guangzhou International Biotech Island, Guangzhou, Guangdong, China

State Project classification: N/A

Project leader: investment service department, GIBI investment & development Co., Ltd.

Tel: +86-20-84299218

Fax: +86-20-84296166

Project II : Guangzhou (Huangpu) Harbor Business Zone (Yuzhu Core Functional Zone)

Project Description: The Yuzhu Core Functional Zone, one of the 500 modern industry projects in Guangdong Province, is to be built in the near future. Its total investment is estimated to be about RMB15,000,000,000. Aimed to be the most characteristic headquarter base in Guangzhou, the 1,200,000-square-meter commercial real estate will attract investment from headquarters of modern service industry(such as commodities interflow, shipping services and port headquarters, business tour, cultural tourism, economy of cruise line, etc.), and life service industry projects(such as hotels, restaurants, and large shopping malls, etc.) as a supplementary.

Mode of cooperation: Lease

Period of cooperation: Negotiable

Total investment : To be confirmed

Chinese side's investment: To be confirmed

Foreign side's investment: To be confirmed

Estimated payback period: To be confirmed

Project site: In Huangpu center urban area, north to Guangyuan Expressway, south to the Pearl River shoreline, west to the border boundary of Huangpu District, east to Shihua Road.

State Project classification: Encouraged

Project leader: Ms. Jiang

Tel: 0086-020-82378540

Fax: 0086-020-82378699

Project III : Mechanical Valley Intelligent Industrial Park

Project Description: With the existing land of Guangzhou Mechanical Engineering Research Institute Co., Ltd. as the starting point, the project will be extended to surrounding land and developed into a base for emerging industry of strategic importance integrated with intelligent mechanical products R & D, testing, manufacturing, exhibition and trade, thus establish a large-scaled intelligent mechanical industry cluster. The project will be divided into two phases. Phase I has a development area of approximately 270,000 square meters, with its construction period being 2012-2014. Industrial service centers, research and innovation area, inspection area, manufacturing area I and living district will be built. Phase II has a development area of approximately 500,000 square meters with its construction period being 2014-2017. Trade and exhibition area, service area, headquartered economic zone, manufacturing area II, logistics and distribution area, etc. will be built.

Mode of cooperation: Lease or cooperation

Period of cooperation: Negotiable

Total investment : RMB 3,000,000,000

Chinese side's investment: To be confirmed

Foreign side's investment: To be confirmed

Estimated payback period: To be confirmed

Project site: the junction of Maogang Road and Huling Road, Huangpu District, Guangzhou

State Project classification: Encouraged

Project leader: Ms. Zong

Tel: 0086-020-82378540

Fax: 0086-020-82378699

Project IV: Lingnan V Valley – Guangzhou International Intelligent Technology Park

Project Description: Lingnan V Valley is a technology park and a scientific RBD for high technology industries and business offices that provide scientific, commerce, services, recreation, entertainment and cultural services. The park will be an incubator for intelligent equipment, new technology and IT industries, attract scientific enterprises to settle in and become an demonstration base for technology innovation, scientific cooperation and technical services. The park will host over 3800 enterprises, generate 100 billion

yuan in annual output value and employ 30,000 labors.

The project is planned for three phases: 220,000sqm for the first phase, 667,000sqm for the second and 1,734,000sqm for the third.

Mode of cooperation: Sell & lease

Period of cooperation: Subject to negotiation

Total investment: To be determined

Chinese side's investment: To be determined

Foreign side's investment: To be determined

Estimated payback period: To be determined

Project site: 657 Huadi Avenue South, Liwan District

State Project classification: N/A

Project leader: Mr. Zhang

Project V: Offshore Wind Power Generation Plant in Nan'ao County

Project Description: Locating in southwest side of an area named La Ba Kou of Taiwan Strait, Nao'ao County possesses rich wind-energy resource. Its annual average—wind-speed, effective wind-energy—density, annual effective average wind-time are 8.54m / s, 1101 watt / m², and 7200 hours respectively. The wind resource condition is ranking in the best group worldwide. Nowadays. the total capacity of generation is 54330 KW According to the measurement and calculation. the wind condition Oil the surrounding sea area is better than that Oil the land. Which will provide some favorable conditions for building an offshore wind. driven power generation plant .In accordance with the overall plan. the project is located 4 offshore areas around the Nan'ao island. Such as, Sea area of Sheng'ao Shizi Bay, which covers 33000 hectares; Sea Area of Houjiang Longmen Gulf, which covers 35000 hectares; Sea Area of Chang Shah Wei, which covers 19000 hectares. The total capital is intended to introduce for development in phases and in areas.

Cooperation Form: whole-funded

Total investment: to be invested base on the real condition

Chinese contribution: provides the offshore area

Foreign contribution: provides the capital

Estimated time of reimbursement: 10 years

Project site: the offshore area of Nan'ao County

Sponsor: Trade Promotion Center of Nan'ao County , Economic & Trade Bureau of Nan'ao County

Project VI: Shantou Industrial Material Trade Center

Project Description: Shantou Industrial Material Trade Center, approved by Shantou Municipal People's Government, is the first spot transaction market dealing with industrial raw materials in eastern Guangdong Province. It is totally invested by Shantou Garden Group. Co .Ltd. with total investment of 500 million, the floor area and construction area are 200 hectares and 143000 square meters respectively. It includes 5 parts: 1 Large construction material supermarket covers 35000 square meters in floor space. It cooperates with East Homestea, a construction material chain supermarket. The commodity varieties are more than 30000. 2 Industrial Material City covers an area of 42000 square meters, with booths covering 9-125 square meters in floor space. The commodity includes plastic, chemical, packaging equipment and general material. 3 Industrial material supermarket covers an area of 8000 square meters. The commodities include stainless steel plate, cold-roll steel plate and nonferrous material. 4 Building of integrated transactions supplies e-commerce, restaurant, hotel and apartment. 5 Exhibition and convention area is 16000 square meters in floor space. There are two layout types: two-and-half story and three-and-half story. The advanced network information system and large e-commerce trade platform is designed to provide advertising and real-time market information both at home and abroad. The trade centre possesses well-equipped communication facilities and logistic advantages. It heartily invites businesspersons both at home and abroad to cooperate.

Cooperation form: joint venture and contractual cooperation

Cooperation term: 50 years

Total investment: 250 million

Chinese contribution: 200 million yuan

Foreign contribution: 50 million yuan

Project site: 166# Zhongshan Road, Shantou. Complete facilities are available

Project progress: under construction

Project VII: Meizhou Internet Industrial Park Construction

Project Description: This project is located in Meixian (Fuda) Industrial Park, Meizhou Hi-tech Development Zone. It will successively attract enterprise provided service as Meizhou Data Centre, E-government Affairs Hub, Telecom Regional Service Center, Call Center, Small and Medium-sized enterprise information Processing Center, Public Technology Service Platform, Hakka Animation, Electronic Commerce and Online Game into the park.

Mode of cooperation: collaboration

Period of cooperation: to be negotiated

Total investment: USD 15 million

Chinese side's investment: USD 5 million

Foreign side's investment: USD 10 million

Estimated payback period: to be negotiated

Project site: Meixian (Fuda) Industrial Park, Meizhou Hi-Tec Development Zone

Infrastructure advantages: Excellent infrastructure and convenient transportation. So far, there are more than ten enterprises in the park such as Hao123, Yixun Technology, Hantang Animation, Meizhou Telecom Regional Service Center, Wecoo, Meizhou Data Centre, Everyday Cooking. com, MZ001 House Property and Decoration. com, Worldwide Hakka Merchants Congress.com and Tianxia Kakka.com.

Information provided: consulting service by Meizhou New Thinking Network Technology Co., LTD

State project classification: encouraged

Project leader: Liao Zhongyuan

Contact No. and Fax No.: 0753-2396986

Enclosed with basic information of the Park

Enterprise profile:

Existing technique of enterprise and management condition: Meizhou New Thinking Network Technology Limited is private scientific and technological enterprise, and has the double soft certification. It is subordinate to Guangdong Small and Medium-sized Enterprise Informatization Innovation Service Center Meizhou Branches. Being the vice-chairman company of Meizhou Information Society and main sponsors of Meizhou Enterprise Service Union, its major business is enterprise informationization construction, electronic government affairs engineering and internet application system development. Its website is including Everyday Cooking.com, Jintian.com, Meizhou Oil Camellia Industry Service Platform and Meizhou Small and Mid-sized Enterprise Informatization Platform.

Project VIII: Stainless Steel Products Trade Center

Project Description: Such enterprises producing & processing Nickel and its upstream and downstream

products as Guangdong Guangqing Metal Technology Co., Ltd. and Century Tsingshan Nickel Industry Co., Ltd. have already settled in Yangjiang New & Hi-tech Industrial Development Zone. As raw materials is adequate, the annual production volume will amount to 0.15 million tons this year. Relying on the above advantages and the existing traditional industry of hardware and cutlery, a stainless steel production and trade center will be formed with a complete industry chain of raw materials production & processing, warehousing, logistics, technology development and supporting service. With the aim of accelerating the stainless steel industry's aggregation and improving its overall competitiveness, an area of 500 mu is planned to build a professional market which can further highlight its resource, technological, market and brand advantages as well.

Mode of cooperation: Sole proprietorship or cooperative venture

Period of cooperation: To be negotiated

Total Investment: To be negotiated

Chinese side's investment: To invest by land

Foreign side's investment: To invest by capital

Estimated payback period: To be negotiated

Project Site: The Pork side Industrial Park in Yangjiang New & Hi-tech Industrial Development Zone

Project IX: Wind-power Generation Plant

Project Description: It is planned to build two wind-power plants in Jiangcheng District, namely Mountain Luoqin Wind-power Plant and Shanwaixi Wind-power Plant. Mountain Luoqin Wind-power Plant is located in the southwestern mountainous part with the elevation of 200 meters where the terrain is flat, the average wind speed is 5.5-6.0 meters per second and the installed capacity of 50MW. Shanwaixi Wind-power Plant is located in the coastal area of the northeastern Yangjiang where the coast line is up to 13.9 km, the elevation is about 30 meters, the average wind speed 5.2-6.0m / s with the installed capacity is 70MW. These two plants are about 20 km to downtown Yangjiang and enjoy rather convenient as the railway station, coastal expressway, Kaiping-Yangjiang Expressway are nearby. Terrains of the wind collection points are flat and suitable for the construction of a wind-power plant.

Mode of cooperation: Joint venture or cooperative venture

Period of cooperation: 50 years.

Total Investment: USD 150 million (to be negotiated)

Chinese side's investment: To invest by land

Foreign side's investment: To invest by capital.

Estimated payback period: 10 years

Project Site: Baisha Street, Fuchang Town, Jiangcheng District

State Project classification: Encouraged

Project Leader: Ms. Huang Donghua from Jiangcheng District Investment Promotion Bureau of Yangjiang City

Project XIV: Western Ecology Region in Shunde

Project Description: Western Ecology Region is situated at the hinterland of Shunde, extending across Daliang, Ronggui, Leliu and Xingtang. The region is planned as 83 km². The area of the western ecology promotion region is 18.86 km², which is the largest reserved land in Shunde.

The Park mainly develops these industries: machinery and molding, PV, intelligent home appliances, biomedicine, environmental protection material and tertiary industry.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative **Period of cooperation:** Within 50 years

Total investment: Undetermined

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: NO. 9, Qilong Road, Xingtang Town, Shunde of Foshan, Guangdong Province

State Project classification: Industry (machinery and molding, PV, intelligent home appliances, biomedicine, environmental protection material and tertiary industry)

Project leader: Amy Gan

Tel: 0757—26362839

Fax:

Project XV: Longjiang Ecology Region in Shunde

Project Description: Longjiang Ecology Region is planned as 550.2 hectare (8250 Mu). The start up area of this park is 2200 Mu, which is ready for advanced manufacturing projects, and would be one of the key developing industrial parks in Shunde.

Longjiang Ecology Region is next to Nanhai of Foshan. The traffic here is convenient. Longjiang-Gaoming RD, PRD 2nd Ring Highway, G325, Foshan-kaiping Highway and Guangzhou-Zhuhai Rail connect the region with the neighboring areas closely.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 50 years

Total investment: Undetermined

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: 2nd Floor Shunde Government Building, No.3, Demin RD, Daliang, Shunde, Guangdong

State Project classification: Industry

Project leader: Sabrina Guo

Tel: 0757-22835745

Fax:

Project XVI: Sewage Treatment Plant (Phase 1) in Guangdong Shunde-Qingyuan (Yingde) Industrial Special Cooperation Zone

Project Description: The sewage treatment plant is located in Yinghong town of Yingde, whose scale is expected to design 50,000 tons per day, with the estimated total investment of 90 million yuan. The cooperation form of it is intended to take BOT. The investment payback period is estimated to be 5-10 years. The project is the first phase of the sewage treatment plant project in economic cooperation zone. This project is built for the collection of the foul water in the Guangdong Shunde Qingyuan(Yingde) Economic Cooperation Zone and its surrounding.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 50 years

Total investment: 90 million

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period: 5-10 years

Project site: East No.1, Sugong Road (Zhenyang Lake), Yicheng Town, Yingde City, Guangdong

State Project classification:

Project leader: Xinghao Lai

Tel: 0763-2668927

Fax: 0763-2668928

Project XVII: Land #F06, Shunde Desheng Central Business District

Project Description: Land #F06 is located between Desheng Road and Guanlv Road of the new city of Shunde. The total area is 113200 m². It is planned to be the types of residential land (R2) which is compatible with commercial services and facilities (C2).

The land is close to the bank of Desheng River and the Riverbank Park. It's also nearby the Tai'ao Highway and only ten minutes to G105. Transportation there is very convenient, and business opportunities are unlimited.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 40 years

Total investment: 3 billion

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period: Business services

Project site: Shunde Government Building, No.3, Demin RD, Daliang, Shunde

State Project classification:

Project leader: Miaochang Liu; Tong Zhang

Tel: 0757-22836877; 0757-22832075

Project XVIII: Standard Factory Buildings in Guangdong Shunde-Qingyuan (Yingde) Industrial Special Cooperation Zone

Project Description: To tie in with the construction of the project settled in the promoter region, to have good construction of facilities in the cooperation zone, to properly solve the housing and the needs of high-quality talents and the front-line workers in the cooperation zone, and to provide a good environment for the development of cooperative enterprises in the zone, this project plans to develop and construct employees' village, a land area of approximately 110 mu, with a total investment of about 500 million yuan. It is planned to build a comprehensive supporting area collecting office, commerce, housing, entertainment, and eating. The first phase commenced in 2012, it is expected to be completed and put into use in 2013. After the completion, the project is expected to accommodate 15,000 employees.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 50 years

Total investment: 500 million

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: East No.1, Sugong Road (Zhenyang Lake), Yicheng Town, Yingde City, Guangdong

State Project classification: industrial real property

Project leader: Xinghao Lai

Project XIX: City-level Project of Development and Construction in Area B of China South Wisdom Valley in Shunde

Project Description: This project is located in the central region of Shunde New Town, from Li Jiasha Channel in the east to Guipan River in the west, from Nanguo East Road and Shunfeng Mountain Park in the south to Chuangzhi Park in the north. Its site area is 438.72 hectare. The content of development and construction includes land collection and storage, field engineering, road construction, environmental greening, various underground pipelines and other supporting facilities. The way to payback can be engineering general contracting mode, the development mode of profit sharing, and land compensation mode etc.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 50 years

Total investment: 2.3 billion

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: daliang of Shunde

State Project classification: urban construction

Project leader: Zhixuan Wang

Project XXVII: South China Wisdom Valley

Project Description: The target of South China Wisdom Valley is to allure leading talents, technical teams, and to lead industrial upgrading, focus on the development of producer services with the core of R & D. It is an important carrier of industrial upgrading and urban upgrading in Shunde.

The central area of South China Wisdom Valley is divided into Section A, Section B, Section C, and Business Incubator, with approximately 7.5 square kms area. Section A is located in Shunde Polytechnic College, has already attached Xi'an Jiaotong University Guangdong Research and other state-level public technological innovation platforms. Section B is located beside Shunfeng Mountain Park, with total area of 6345 mu. The Section B is to start the first phase of 850mu and build Headquarters Innovation Zone, Enterprise Incubator, R & D area, and Personnel Communities.

Mode of cooperation: Wholly-owned, Joint Venture & co-operative

Period of cooperation: Within 50 years

Total investment: Undetermined

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: 5th Floor Shunde Government Building, No.3, Demin RD, Daliang, Shunde, Guangdong

Project XXIX: Friends of the World Industrial City

Project Description: This project plans to cover an construction area of 650,000 m² and floor space of about 300 Mu, with comprehensive industrial supporting facilities such as factory area, staff village, business offices, parking lots etc.. At present, 3,300 m² X 5 floors X 6 independent buildings are ready for purchase or rent.

Mode of cooperation: to rent/ to let

Period of cooperation: Within 50 years

Total investment: Undetermined

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: Friends of The World Industrial City, No.197 of Junyi Rd., Jun'an, Shunde, Foshan

State Project classification: Industrial plants

Project leader: Zhanhui Tan

Tel: 0757-23609333

Fax:

Project XXX: Hongyu Industrial Park

Project Description: Located in Leliu Town, this project covers an area of about 64,400 square meters, planning to build 16 standard factories with total construction area of 136,000 square meters. The industrial city has convenient transportation, lane width of 15 meters, and 24 hours monitoring and security inspections. For light manufacturing, it offers plants with a single longitudinal span of 8 meters and sets up two freight elevators with 5 ton-loading capacity. The height of the first floor storey is six meters, designed for heavy-loading ground and equipped with crane girder of 2- tons weighting capacity; the height of other floor is 4.38 meters, with floor design loading capacity of 500kg/m².

Mode of cooperation: to rent/ to let

Period of cooperation: Within 50 years

Total investment: Undetermined

Chinese side's investment: to be determined

Foreign side's investment: to be determined

Estimated payback period:

Project site: No.6 of Huangzhong Rd. Tanxi Industry Park, Jiangyi, Leliu, Shunde, Foshan

State Project classification: Industrial plants

Project leader: Mr. Liang

II. Agriculture

Project I: Processing Base of Agro-industry

Project Description: Maoming is a large livestock industry city in Guangdong Province. The annual output of meat is more than 600,000 tons. Pig breeding stock is more than 3 million heads, poultry breeding stock is more than 55 million, annual hog slaughter volume is 5.4 million heads, and annual poultry slaughter volume is 158 million. And fruit growing area reaches 4 million mu with an annual output of more than 2 million tons. Vegetable's growing area is more than 1.3 million mu with an output of more than 2 million tons. The project plans to rely on the rich food and meat and vegetable output in Maoming, to largely develop the further processing of meat vegetables and fruits, such as dehydrating vegetables and fruits, dried, frozen, salted and other processing items.

Mode of Cooperation: Joint venture, Cooperation, BT or Consultations

Period of Cooperation: 50 years

Total Investment: 1 Billion RMB

Chinese side' Investment: Negotiated

Foreign side's Investment: Negotiated

Estimated payback period: 10 years

Project site: Bohe Offshore Industry Park, Guangdong Maoming Binhai New Area

State Project classification: Encouraged

Project leader: Mr. Shao HangWei

Fax: 0086-668-2536103

III. Light Industry and Building Materials (Including Food Processing Industry)

Project I: Subtropical-fruit-wine Production of Nangno Xiangyi Brand

Project Description: Subtropical-fruit-wine, Nangno xiangyi Brand is made from pure juice of tropical and subtropical fruits as raw material and processed through modern biological zymolysis. It is a quality of 12 degree dry wine with characteristics of low alcohol, purity, nourishment and healthcare. The production processing adopts patented technology. This achievement has passed the examination of Guangdong Provincial Science and Technology Achievement, which has been filled up the gap in the areas of technology in China and it is now in the leading part of China The products have been accredited by the ISO9001 quality system The application for HACCP, Green Foodstuff, Original Palace Protection and examination—free is underway.

Cooperation form: joint venture, cooperation

Cooperation term: 10 years

Total investment: 35 million US dollars

Chinese contribution: 22.5 million US dollars(include land, factory building, equipment, technology)

Foreign contribution: 12.5 million US dollars (capital)

Estimated time of reimbursement: 10 years

Project site: the new factory locates in Wanji Industrial Park, Shantou city, 12 kilometers away from airport, 1 kilometers away from the train station, 10 kilometers away from the port. Convenient transportation and developed telecommunication are available here. The factory is designed strictly complying by the hygiene criteria of registered enterprises of exporting food, as well as the infrastructure and utilities.

Project progress: It is designed in accordance with an annual capacity of 20000 tons. It has been developed by means of the rolling mode of producing, selling, investing, as well as building at the same time. At present, the first phase of the project has been put into installation. It is planned to complete the whole project in 2010.

Introduction of enterprise: Shantou Yayuan Biological Engineering Co., Ltd is engaged in R & D of ocean organism, as well as producing and marketing of food stuff additive, nonalcoholic beverage and fruit wine. This is a new and hi—tech enterprise. Guangdong Provincial Name—brand Foodstuff Enterprises and National Quality-and-Hygiene Standardized Foodstuff Enterprise. It possesses total area of 42 hectares, factory building with floor area of 20000 square meters and strong technological capacity.

Project II: Healthcare Products of Sheng’ao Brand

Project Description: The enterprise independently researched and developed Sheng’ao brand healthcare products with great healthcare functions. All the products are especially made from traditional Chinese medicine and herbal, edible vegetable and fruit agriculture by-products. The series of Sheng’ao including 15 kinds of products have been successfully manufactured as follows: salted kumquat, Shanlin blood-sugar-reducing capsule, Yuluohan Chinese herbal tea, balsam pear tea bag, all—seasons herbal tea, alga Pumpkin Tea, as well as products that can eliminate the corpulent—effect from poultry and remained

fertilizer (successful at medium— experiment). It is intended to introduce funds for further development and expanding production.

Cooperation form: joint venture, cooperation, and others

Cooperation term: 5—8 years

Total investment: 100 million yuan

Chinese contribution: 2 million(factory building, equipment and technology)

Foreign contribution: 8 million (capital)

Estimated time of reimbursement: 3 years

Project site: Longhu Industrial Park, Shantou city. Complete infrastructure and utilities are available.

Project progress: Partial products have been put into the market.

Introduction of enterprise: Shantou Sheng'ao Healthcare Foodstuff Co. Ltd is located in 6F Light Industry Building, F3, Longhu Industrial Park, Shantou. It possesses factory building with all area of 1100 square meters Shantou Wan'an Medicament Research Institute is affiliated to the company, which has strong capacities of research and production. The enterprise has obtained the certification of ISO9001_2000 quality system. It was awarded as Guangdong Provincial Private-owned Science & Technology Enterprise.

Project III: Storing and Deep Processing of Agricultural and Sideline products, and Aquatic Products

Project Description: Yanhong Town which is one of the key towns in Shantou is rich in agricultural resources and its agriculture is preferable. It is famous for the seafood such as Yanzao Crab, Yanzan Boke (shell) meat, Yanzao Oyster, Shangshe Celery, Honggou Linqin, Honggou Celery, etc There is a prospective and prosperous market in developing the high increment rate for freshness keeping and deep processing of agricultural by-products and seafood.

- I. "Mini-type packaging of pickled mustard" item is planned to have all annual output of 1,500 tons with investment of 1.35 million yuan.
- II. "Exuviations of Boke (shell)and processing and pickled Boke(shell)meat" item is planned to have an annual output of 300 tons with investment of 3 million yuan.
- III. "Freshness keeping of seafood products by freezing" item is planned to have an annual output of 200 tons with investment of 1.60 million yuan

- IV. “Freshness keeping Of Linqin fruits” item is planned to have an annual output of 2,000 tons with investment of 3 million yuan.
- V. “Freshness keeping of vegetable by dehydration” item is planned to have an annual output of 100 tons with investment of 1.5 million yuan.
- VI. “Pickle and processing of plum fruits” item is planned to have an annual output of 150 tons with investment of 1.8 million yuan

Cooperation form: joint venture, contractual cooperation or whole—funded

Total investment: 17.25 million yuan

IV. Machinery

Project I: Manufacture of Various Types of Port Machinery

Project Description: Yangxi County Ocean Characteristic Industry Base is near Yangjiang Fengtou Port –a national class port which can accommodate ships to even 300,000-ton class. Guangdong Huaxia Yangxi Power Plant is nearby, so power supply is sufficient. As world economy is getting warmer, the port construction is accelerated and the demand for port machinery and supporting facilities is increased as well.

In order to make good use of the superior shoreline resources, capital is attracted to manufacture different port machinery and heavy machinery as well.

Mode of cooperation: Joint venture or cooperative venture

Period of cooperation: 30 years

Total Investment: USD 300 million (to be negotiated)

Chinese side's investment: To invest by land

Foreign side's investment: To invest by capital, technology and equipment

Estimated payback period: 9 years

Project III: Hongda Xingye Group & Guangdong Plastics Exchange Headquarters Building

Project Description: Hongda Xingye Group & Guangdong Plastics Exchange Headquarters Building is located on Dongsha Avenue East, Liwan District. As the only plastics exchange in China approved by the Ministry of Commerce, it is Guangzhou's key electronic transaction platform for stable commodities. The Guangzhou Price for plastics and Plastics Indices here reflect the price fluctuation for the plastics industry. The total investment for Hongda Xingye Group & Guangdong Plastics Exchange Electronic Business and Logistics project will be 1 billion yuan. With a total land area of 131, 276sqm and a total floorage of 205,345sqm, the project will be a Class A office building and become an electronic transaction platform and plastics service center for the plastics industry. World Top 500 and China Top 500 enterprises, public companies and large-scale enterprises are welcomed to settle in the project.

Based on the large customer bank of Hongda Xingye Group & Guangdong Plastics Exchange, the project will be built into a 300,000-ton plastics warehousing and logistics center, an international plastics headquarters base, an exhibition center and an information center. As Guangdong's New Ten Projects and

Guangzhou's Key Projects in 2008, it is an important part of Guangzhou Logistics Base, being the large modern services development project supported by Guangdong and Guangzhou governments. The project is also designed with a green concept, employs the latest achievement in energy saving technologies and is a leading eco-friendly project in China.

Project IV: The National Industry Base of Digital Home Application and Demonstration

Project Description: National Digital Home Base was established by State Ministry of Industry and Information Technology, Guangdong Province, Guangzhou City, Sun Yat-Sen University in September 2009. It has formed a framework called "One Core Theory, Two Key Focus, Three-step Technology Routes, Four Sustain Entities". This framework aims at improving the digital home industry and enhancing Industrial Agglomeration.

It is now focusing on the building of the Guangzhou Higher Education Mega Center Digital Home R & D Park, Digital Home Business Park and Digital Home Manufacturing Park. 238 companies have settled in National Digital Home Base and in 2011, its output value reached 9.7 billion RMB

The National Digital Home Base is now accelerating the implementation of Large Project Leading strategy. It also actively introduce and cultivate high quality enterprise which provide excellent services at chip design, software development, machine manufacturing, network operation and maintenance service supply.

Mode of cooperation: Office building rental

Period of cooperation: Long term

Total investment: According to the specific project

Chinese side's investment: Land, policy, supporting facilities

Foreign side's investment: Technique and technical personnels

Estimated payback period: Long term

Project site: Panyu District Guangzhou City China

State Project classification: N/A

Project leader: Mr. Zhaofu Wang

Tel: 8620-34616029

Project V: High-definition Video Complex Cable

Description of project: The newly created products are self-explored and manufactured according to the requirements of the developed countries in Europe and America and it's the first company in China to adopt a combined structure of RG59 High Definition Video cable and 18 / 2 low tension electrical wire. Having been successfully manufactured, it entered American market for the purpose of antiterrorism monitoring and works perfectly with its good quality. Now it is in great need of funds for enlarging factory buildings and purchasing new insulated frothing sets, high speed knitting machines, jacket extruder set, high speed consecutive anneal draw bench, high speed wire wringing machines and examining facilities, etc. Furthermore, three high speed production pipe linings are to be organized to expand the production scale so as to have a planned yearly output of 5,000 km with an annual sales income rise of 50 million yuan to satisfy the demand of market development at home and abroad.

Cooperation term: 20 years or long—term

Chinese contribution: 15 million yuan

Foreign contribution: 10 million yuan (5 million to provide equipments, 1 million to provide technology and brand, 1.5 million to provide factory building. 1.5 million to provide land and 1 million to provide production fund)

Counterpart investment: 2 million to provide equipments and 3 million to provide floating funds

Estimated time of reimbursement: 3 years

Project site: Lianxia Town, Chenghai District, Shantou

Category: Permitted

Infrastructure Conditions: I. Complete sets of electricity and water for both manufacturing and drinking are ready for operation. II. The factory building is near the Dianshi exit of Shanfen Expressway and 324 State—highway which leads to the first grade road directly. Therefore, the transportation is very convenient. III. The factory building has been established with Wide Band.

Current construction conditions: Manufactured successfully in July of 2005, it has been produced by batch with the existing equipments of the company However, only 1000 km of annual output is still far away from the export needs.

Introduction of enterprise: The company was founded in 1989 to be the first complex enterprise in Eastern Canton area in manufacturing communication cable, optical fiber cable, radio coaxial cable, electric power cable and special fireproof cable. Its registered fund is 18.218 million yuan and fixed assets is 45 million yuan. The factory building covers an area of 40,000 m² with 320 employees among which 38 are engineering and technical professionals. There are modern production sets and examining facilities for special purposes. A technology examining center has been constructed. Shanlan is a registered trademark which is one of the first Guangdong Provincial Famous Trademarks. The communication cable obtained the award of Guangdong Provincial Name Brand Product. The company also obtained many awards such as Guangdong Provincial New and High-tech Enterprise, Guangdong Provincial Advanced Enterprise in Adopting International Standard, the Best Shantou Municipal Private—owned Enterprise, and the Scientific Private—owned Enterprise. The management system of the company obtained ISO9001-2000 certification. Its products such as communication cable, optical fiber cable, radio cable and electric power cable have obtained the entrance permits of the National Quality Supervising Bureau. Information Industry Department, Guangdong General Bureau and also the entrance permit of national defense facilities from the general staff of the People's Liberation Army Of China. Moreover, the company has been a fixed supplier for telecommunications of Guangdong, Fujian, Guangxi, Hunan and Jiangxi province as well as the Guangdong, China Power, China Tietong and Chinanetcom. Sales offices have been set up in many cities including Guangzhou, Xiamen and Changsha, which lead to a rising trend for its business.

VI. Chemical and Medicine

Project I: Guangzhou International Health Industry City

Project Description: Guangzhou International Health Industry City is located in Maofeng Mountain of the Northeast of Baiyun District. Its planning development land area is about 35 square kilometers, and its planning study area is about 134 square kilometers.

Health City adheres to the concept of people-oriented, which is the ultimate goal, focuses on human life, and strives to build an organic composition and coordinated development area with healthy crowd, healthy

environment and healthy society.

Strategic Positioning:

- I. The International Healthcare Center
- II. The National Chinese Medicine Industry Base
- III. South-China Medicine Research and Development Base
- IV. The Pearl River Delta Fitness Regimen Base

Mode of cooperation: Lease

Period of cooperation: Negotiable

Total investment: 50 billion

Chinese side's investment: To be confirmed

Foreign side's investment: To be confirmed

Estimated payback period: To be confirmed

Project site: Zhongluotan Town, Baiyun District, Guangzhou City.

State Project classification: N/A

Project IV: Development and Application of Marine Microalgae Powder That is Rich in DHA and DPA

Description of project: The company covers area of 14 thousand square meters. Having its own Research Center and Pilot Plant Facilities, the main technical projects accomplished by the company are the technology of extracting DHA+DPA—rich(without WPA) Microalgal powder and AA powder by breeding marine microalgal in a high density way with biological reactor, and the technology of producing edible green algae powder.

Cooperation form: joint venture, contractual cooperation

Cooperation term: more than 5 years

Total investment: 15 million yuan

Chinese investment: having a factory building, a Research Center and Pilot Plant Facilities; scientific and technical personnel; technical achievements in biology development; products which have entered the market with wide sales channels; part of cooperation funds(5 million yuan)

Foreign investment: 10 million yuan

Estimated time of reimbursement: 5 years

Project site: Longsheng Industrial Park, North Dongxia Road, Shantou

Infrastructure conditions: Complete infrastructure and utilities are available.

Project V: Coastal Large-scale Integrated Refinery Project

Project Description: Guangdong provincial Party committee and provincial government position Maoming as a world-class petrochemical base. In the short term, complete the expansion of 25.5 million tons refinery / year and reach 25.5 million tons refinery scale per year. In the medium term, that is “Twelfth Five-year Plan” period, through internal technique innovation, the refining capacity reach 30 million tons / year. At the same time, start the promotion and build of key petrochemical aromatics industrial chain project of new-added 1 million tons ethylene/ year, ethylene oxide, phenol and acetone, and EPA. Primarily form the world-class petrochemical base. For long term, 25 million tons/ year refinery plant is going to be built. Build new 1 million tons ethylene/ year, and realize the petrochemical production capacity of 50 million tons refining per year, 3 million tons ethylene per year, and 2 million tons aromatics per year. Reach the world-class petrochemical base scale. We plan to build a new oil refinery plant which can refine 15 million tons oil per year (set aside 25 million tons / year for extension), 1 million tons ethylene / year, and 2 million tons aromatic / year. The planned area is 20 square kilometers.
