

## k Levels of Entry Biological Materials and List of Measures for Quarantine and

Risk Level	Scope of Biological Materials	Entry Quarantine Approval	Foreign Official Quarantine Certificate	Additional Declaration when Applying for Inspection	Port Inspection
Class A	Animal Pathogenic Microbes for Scientific Research in <i>Classified Catalog of Animal Pathogenic Microbes</i> (Order No. 53 of the Ministry of Agriculture in 2005)	Yes	Yes	No	Yes
	Animal Parasite, Animal-derived Infectious Substances (Including Organ, Tissue, Cell, Body Fluid, Excrement, Feather and Infectious Biosynthesis Bodies)				
	Strain (Virus Seed) for Registration, Inspection and Preservation of Animal Vaccine				
	International Comparison Experiment and Proficiency Testing				
Class B	Experimental Animal of SPF Class and Above	Yes	Yes	No	Yes
	Genetic Materials of Experimental Animal of SPF Class and Above Including Seminal Fluid, Embryo and Ootid				
	Noninfectious Animal Organ, Tissue, Cell, Blood and Its Product, Secreta, Excreta and Extractive (Excluding Biological Materials from Experimental Animals of SPF Class and Above)				
Class C	Diagnostic Reagent within Animal Body and Non-commercial Diagnostic Reagent Containing Animal-derived Ingredients	Yes	No	Yes	Yes
	Gelatin for Scientific Research (Limited to Pig Skin Gelatin, Oxhide Gelatin and Fish Gelatin)	Yes	No	Yes	Yes
	Culture Medium Containing More than 5% of Animal-derived Ingredients	No	Yes	No	Yes
	Organ, Tissue, Cell, Blood or Relevant Product, Secreta, Excreta and Extractive of Experimental Animal of SPF Class and Above	No	Yes	No	Yes
	Model <i>Drosophila</i> and Model Nematode for Experiment	Yes	No	No	Yes
Class D	Culture Medium Containing Less than or Equal to 5% of Animal-derived Ingredients	No	No	Yes	Yes
	Commercial IVD Reagents for Detecting Bioactive Substances Including Antigen-Antibody				
	Biochemical and Commercial IVD Reagents for Detecting Enzymes, Carbohydrate, Lipid, Protein, Non-protein Nitrogen and Inorganic Element				
	Continuous Cell Line of Animal from Commercial Cell Bank (ATCC, NVSL, DSMZ, ECACC, KCLB, JCRB, RIKEN)				
	Genetic Materials and Biosynthesis Bodies Excluded from <i>Classified Catalog of Animal Pathogenic Microbes</i> (Order No. 53 of the Ministry of Agriculture in 2005) Including Microorganisms, DNA/RNA of Non-pathogenic Microorganisms, Plasmid and Bacteriophage of Non-pathogenic Animals				
	Animal Interferon, Hormone, Toxin, Toxoid, Enzyme and Enzyme Preparation, Monoclonal (Polyclonal) Antibody, Antitoxin, Cytokine and Microsome				
Animal Tissue, Organ and Its Slice in Chemical Denaturation Treatment
